Profile

Engineer in Creative Technologies working across software, machine learning and physical prototyping. From developing radar processing pipelines at FORVIA to building software and interactive systems from scratch, I enjoy tackling unfamiliar technical challenges and turning ideas into working products. Looking to contribute to the development of innovative products through hands-on engineering and experimentation.

Experience

2026 - **FORVIA** • Radar Innovation Intern - 5 months - Bercy (75)
- Radar Processing Pipeline & development framework
  - Modular environment for radar algorithm development, testing and analysis
- In-Cabin Position Study
  - Test environment and procedure design, data processing and statistical analysis
- ~~IMS Resources & CI Integration~~
  - Refactoring of existing resources, environment architecture, documentation and Git/CI integration
- CODEX HMI Demonstrator
  - Live multi-input / single-display HMI design and implementation

2024 - **EMITECH** • Automotive Test Intern - 2 months - Bosroumois (27)
- Test cycles programming for car components - performance analysis and optimization
- Hands on assembly & maintenance

2022 - **PARC ASTERIX** • Versatile Employee - 2 months - Plailly (60)
- Customer relations - Inventory Management - Organization of deliveries

Projects

PORTFLIO

GITHUB

2025 - **Between Threads** • Computer vision-controlled puppet theatre with a Unity-based AR interface, Raspberry Pi servo control and UDP communication over a VPN

2026 - **WhisPER** • End-to-end encrypted messaging application developed in Rust and deployed on Raspberry PI

2026 - **Attention Plz** • Transformer for machine translation built with PyTorch, implementating the attention mechanism from scratch, with a web interface and configurable training data.

Education

2024 - 2027 • **ESILV** • Engineering school - La Defense (92) - Double degree General Engineering & Master of Science
- Major in Creative Technologies - Human Computer Interactions - Artificial Intelligence - Prototyping
- **UVIC** • Spain - Erasmus Semester - Software engineering and Interoperability projects

2022 - 2026 • **ESIGELEC** • Rouen (76) - Mathematics /Physics /Engineering sciences focused integrated preparatory cycle

2018 - 2022 • **Ermitage International School** • High school - Maisons-Laffitte (78) - French / American General Baccalaureat

2016 - 2018 • **International School of Stuttgart** • Germany - Middle/High School

Technical

Programming • Python - Web - Rust - C# - C++ - SQL
Software Development • Git - CI - Docker - Linux (Unix) - Environment management
Artificial Intelligence • PyTorch - Computer Vision - Neural Networks - LLMs & Agents
Digital Fabrication • Fusion - KiCad - Arduino - Electronics - Mechanics

Langues

French (Native) • English (Bilingual - TOEFL : 633/677) • German (Basic)

Personal Interest

Triathlon (Ironman training) • Climbing • Illustration & design • Craftsmanship • International culture & living abroad
